Dear sir, I hope you are aware of the natural disaster happened in whole Kerala, India during the last weeks due to heavy rain and flood.

Our IEEE-IAS students chapter extended all the possible helps from our side. In short span of time we managed to provide power banks for charging the mobile phones for the people who were there in the refugee camps. We made our own product of more than 200 power banks with the help of our students. It was made working with the help of 4 AA batteries non rechargeable. The production done in two centres. One centre was at Trichur district under the leadership of Mr. Jinesh IEEE counselor of Jyothi Engineering College and the other centre was at Palakkad district under the leadership of myself, Mr. Jithin K. Jose IEEE-IAS Staff Advisor Jyothi Engineering College . The approximate total cost for the items purchased for the production was about 15000 INR.

We gave an idea for the students regarding how to make the power banks by arranging a workshop in both centres and did the work to its fullest.

Attached herewith some of the moments which taken during the work at both Trichur and Palakkad centres.

The college Management and the Principal also supported us a lot during the two days work .

Regards

Jithin K. Jose
