Myron Zucker Undergraduate Student Design Contest 2023

Guidelines

Scope:

The design contest is aimed at undergraduate students enrolled in an academic engineering program, or equivalent, who wish to submit their undergraduate engineering design project. The project needs to be within the scope of the IEEE Industry Applications Society (<http://ias.ieee.org/>)

Contest Categories:

The IEEE IAS Myron Zucker Undergraduate Student Design Contest includes both individual and team submissions. Teams are limited to three members. Submissions from teams with more than 3 members will not be accepted. At least one student involved in the design project needs to be an IEEE IAS member.

Eligibility:

The design project must fall within the scope of the IEEE Industry Applications Society. Most senior level engineering or undergraduate design projects (before MSc degree) qualify. At least one student involved in the design project must be a member of the IEEE IAS, the design project must fall within the scope of IEEE Industry Applications Society and the students must have received academic credit for the project work.

The intention of the contest is to allow students to present the work carried out in some sort of academic environment. Normally this is proven by the fact that the students receive some type of “credit” or “grade” for their participation. However, if a member of the academic staff is willing to certify that the work was carried out by a student team in an academic (non-professional) environment, then that it is acceptable and within the intentions of the contest in general.

Basis for judging:

The Evaluation Committee will determine award selection based upon:

- i. the extent to which the solution of the design problem demonstrates the practical application of engineering fundamentals and engineering judgment
- ii. Quality of research and significance of the contributions demonstrated by the project
- iii. The quality of the written report
- iv. Significance of the work to the scope of the Industry Applications Society
- v. The extent to which an industrial entity, if any, provides appropriate guidance and access to an applications environment.

Cash Honoraria for winners

- 1st Prize: \$800 for students and IEEE IAS certificate
- 2nd Prize: \$600 for students and IEEE IAS certificate
- 3rd Prize: \$400 for students and IEEE IAS certificate

All cash honoraria will be divided equally among team members. In addition to the cash honorarium, the IAS will award each winner or one member from each winning team an Annual Meeting Travel Grant to attend and present their work at the 2023 IAS Annual Meeting. The travel grant is subject to the IEEE travel regulations, the modality of CMD activities at the IAS Annual Meeting and the status of the Annual Meeting Travel Grant Program. CMD reserves the right to suspend the Annual Meeting Travel Grant Program (AMTGP).

Submission:

1. All submissions should be uploaded using the Myron Zucker Undergraduate Design Contest 2022 online form: [Zucker Submission Form 2023](#)
2. The report should be a minimum of 10 pages but should not exceed 25 pages in length (strictly enforced), in Microsoft Word or PDF (PDF is preferred).
3. Submission deadline is 30 April 2023 .
